

## **Environmental Statement**

Lord & Midgley Ltd recognises that environmental issues are of fundamental importance to a successful and responsible business strategy. Therefore it is committed to minimising the environmental impact of its operations wherever possible.

In line with this commitment to the environment Lord & Midgley Ltd will :-

- ❖ Ensure that its operations comply with all existing and proposed legislation.
- ❖ Minimise energy wastage and waste wherever possible and practical.
- ❖ Train and educate its workforce in the relevant aspects of environmental best practices.
- ❖ Review its environmental policy on a regular basis.

The company continues to work with all the regulatory bodies in order to minimise the environmental impact of any breach of legislation, and to prevent the recurrence of all such events.

The company's catchment area covers the whole of Northern England and the company provides a disposal point, which prevents wholesale spoiling of the environment by random tipping. The object is to recycle all material wherever possible, and the company will provide advice in situations where waste is environmentally unfriendly and cannot be accepted by industry.

The company is committed to reducing harmful emissions, and to recovering as much product as possible from materials supplied, thereby reducing the amounts of materials wasted and sent to landfill sites.

As a company we are also aware of the effects noise and dust pollution of the environment and the detrimental effect this can have on the lives of the public. We are continually carrying out modifications in procedures to substantially reduce pollution. We also have a policy of continuous reviews and improvements
